

AGILE TICKETING SOLUTIONS WEBSITE INTEGRATION OPTIONS

Integration Methods

Direct Links

Agile Ticketing Solutions supports several types of listing and information-based pages dynamically generated based on the content entered into Agile Ticketing Solutions' event management area. This type of integration is as easy as inserting a link into your organization's CMS/website. When your customer clicks on this link ("Buy Tickets" or "Become a Member" for example) on your site, they are directed to the Agile Ticketing Solutions' purchase process to purchase tickets, memberships, and other items. This is the simplest and most affordable option for most organizations.

EXAMPLES

rodeocinema.org
the-iowa.com

Addit Links

Addit links are a straightforward and simple way for the consumer to add an item to their cart in a single click, from either your organization's CMS/website or from Agile Ticketing Solutions' information page.

Though typically utilized for the purchase of a new membership, addit links may be used for additional items (donations, gift cards, catalog items). Most organizations combine this integration method with another, such as the Direct Links method (see above). This option is affordable for most organizations but may require some intermediate HTML or CSS programming language knowledge if needs are highly complex or sophisticated.

EXAMPLES

nantucketdreamland.org
sagharborcinema.org
